SUMMARY

Full Stack Developer with 2.5 years of experience building and supporting web-based business applications, now transitioning into IT Business Analyst / Technical Business Analyst roles. Hands-on exposure to understanding business workflows, clarifying module requirements, preparing functional notes, supporting user stories and acceptance criteria, validating REST API behavior, and performing database-level checks using SQL/MongoDB. Worked on HRMS, LMS, CMS, employee management, attendance automation, and community platform modules, with strong technical foundation in MERN, Node.js, Express.js, REST APIs, MongoDB, and MySQL to bridge communication between requirements and implementation.

TECHNICAL BUSINESS ANALYSIS SKILLS

Business Analysis Exposure: Requirement Understanding, Requirement Clarification, Functional Requirement Notes, Workflow Analysis, Process Mapping, Gap Identification, Impact Analysis, User Journey Understanding, Stakeholder Coordination Support

Documentation: Functional Notes, Module Documentation, User Stories, Acceptance Criteria, Use Case Notes, Process Flow Notes, API Validation Notes, UAT Test Scenarios, Data Validation Notes, Feature Documentation, Basic BRD/FRD-Style Notes

Tools & Technologies: REST API Analysis, Request/Response Validation, Database Validation, Role-Based Access Flow, System Integration Understanding, CMS/LMS/HRMS Workflows, Jira, Confluence, MS Excel, PowerPoint, Draw.io/Lucidchart, Postman, Swagger/OpenAPI, Git, GitHub, Figma, Agile/Scrum, SQL, MongoDB, MySQL, Node.js, Express.js, React.js

PROFESSIONAL EXPERIENCE

Telecom Network Solutions Pvt. Ltd., Noida, U.P. - Full Stack Developer — Web Applications / Technical BA Exposure

NOV 2023 - PRESENT

- Developed and supported web-based business application modules across HRMS, LMS, CMS, employee management, attendance automation, and discussion forum platforms.
- Participated in requirement clarification discussions and converted understood workflows into functional notes, module-level tasks, user stories, and acceptance criteria for development and testing support.
- Worked closely with developers, designers, and business users to clarify feature expectations, identify gaps, validate feasibility, and support Agile delivery.
- Analyzed manual HR and administrative workflows during implementation and helped automate employee management and attendance-related processes, contributing to reduced manual administrative effort.
- Supported REST API validation using Postman by checking request/response behavior, status codes, validation errors, data flow, and expected functional outcomes.
- Performed SQL/MongoDB validation to verify that frontend actions, API responses, and stored records matched expected business behavior and role-based access rules.
- Supported UAT activities by preparing basic test scenarios, validating expected behavior, documenting issues, coordinating fixes, and confirming resolution with the technical team.

SequelString AI Pvt. Ltd., New Delhi - Trainee Engineer / Process Automation

JAN 2023 - JUNE 2023

- Analyzed manual data collection workflows and converted them into repeatable automation scripts using Python, BeautifulSoup, Selenium, and Requests.
- Understood task-level requirements by identifying data sources, expected outputs, validation rules, workflow dependencies, and data quality expectations.
- Performed data extraction, cleaning, validation, and basic pattern analysis to improve accuracy, consistency, and repeatability of automated data collection.
- Documented automation logic, validation observations, output behavior, and known limitations to support internal review and future improvements.

TECHNICAL BA & DEVELOPMENT PROJECTS

Archaeological Survey of India - Delhi Circle | CMS / Heritage Website Platform

Developed and supported a responsive MERN-based heritage website platform for showcasing historical sites and improving public accessibility. From a Technical BA perspective, analyzed admin content workflows, public user journeys, content update needs, image/content management, role-based access expectations, and structured content presentation requirements.

Employee Management System - Ceekh Edunix | HR Workflow Automation Platform

Developed and supported HR workflow automation features for employee record management, attendance tracking, role-based access, and administrative operations. Analyzed existing manual workflows and translated them into system modules, validation rules, user journeys, and expected functional behavior.

Learning Management System - EduWe | LMS Platform

Worked on LMS modules involving learner, admin, course, dashboard, enrollment, and synchronization workflows. Translated feature expectations into development-ready tasks, user stories, acceptance criteria, and validation scenarios. Supported REST API validation and data flow verification.

Discussion Forum - EduWe | Community Interaction Platform

Developed and supported discussion forum features such as post creation, comments, moderation, upvoting, learner-teacher interaction, and community engagement workflows. Analyzed user interaction flows, validation rules, backend data behavior, and role-based actions using MongoDB, EJS, Express.js, and Node.js.

BUSINESS ANALYSIS & TECHNICAL DOCUMENTATION EXPOSURE

Functional Notes, Module Documentation, Requirement Clarification Notes, User Stories, Acceptance Criteria, Use Case Notes, Process Flow Notes, API Validation Notes, UAT Test Scenarios, Role-Based Access Flow Notes, Data Validation Notes, Feature Documentation, Basic BRD/FRD-Style Notes

EDUCATION

Master of Computer Applications (MCA) | 2021-2023 | G.L. Bajaj Institute of Technology and Management, Greater Noida, U.P.

Bachelor of Computer Applications (BCA) | 2018-2021 | Institute of Technology and Management, Ghaziabad, U.P.

DOMAIN EXPOSURE

HRMS, LMS, CMS, Employee Management, Attendance Automation, Content Management, Learning Platforms, Community Platforms, Admin Dashboards, Role-Based Access, Web-Based Business Applications
